

The wireframe illustrates the layout of the YelpCamp application across four main pages:

- Welcome Page:** A landing page featuring a navigation bar with "YelpCamp", "About", "New", "Log in", and "Sign up". Below the bar is a heading "WelCome". A search bar labeled "Search" is positioned above a grid of six campsite thumbnails, each labeled "Camp 1" through "Camp 6". Navigation arrows ("Prev" and "Next") are located below the grid.
- View Campground Page:** A page for viewing details of a specific campground. It includes a "Camp picture" section, a "Booking time" input field, a "Location" input field, a "Contact" input field, a "Rating" input field, a "Comment 1" input field, a "Comment 2" input field, a "Map" section, and a large "Add new comment" input field.
- Log in Page:** A page for user login. It features fields for "User name" and "Password", and buttons for "Log in" and "Sign up".
- Sign up Page:** A page for user sign-up. It features fields for "User name" and "Password", and buttons for "Log in" and "Sign up".

**Welcome Page:** on welcome page, you can see different campsites displaying and you can go to the campsite page by clicking on the pictures of each campsite. Prev and Next button can lead you to different pages of the campsites. The navigation bar on the top, there are **About**, **New**, **Log In**, **Sign Up** buttons that lead you to description, new campsite, log in and sign up pages.

**View Campground Page:** Displays information about different campgrounds and comments made by users.

**Create New Camp Page:** Creators can create different campgrounds, upload campground picture, location, availability, map description on this page.

**Log in :** User loggin page to create campground or to comment on existing campgrounds.

**Sign up:** For users to sign up for their account.
